QUALITY-ECONOMY-SERVICE

Economical Power for Years To Come!

John Deere Farm Tractor

In the John Deere Tractor you get power you can depend upon, month after month, year after year, at costs that are surprisingly low,

Great Power—Light Weight— You Want Both

In the tractor you buy, you want ample power to do your field and belt work in volume that will effect real economies. But you dan't want to drag around a lot of surplus weight to eat up power, thet and oil. It's the successful combine that makes that makes that makes the belt of the continuous, unation of light weight, strength and power that makes the belt of the tractors to equal.

Let us show you why the John Deere is the tractor best suited to your farm needs,

5,000 FACTS ABOUT CANADA

The 1920 edition of that poplar annual, "5,000 Facts about Canada," edited by Frank Yeigh, the well-known Canadian author and publicist is now off the press and contains a wealth of material that presents the stirring story of our national progress in crisps, concrete form. Many new features mark thus issue, such as the striking expansion during the past striking expansion during the past ten years since the armistice, as well ten years since the armstuce, as wein as the remarkablo advance made in the last 12-months' period of "Cana-das Best Year." The booklet "sells Canada" most effectively, and is widely distributed for that purpose, while it is invaluable to any Canadian who wishes to know his own country.

The 50 chapters of contents tells the all-Dominion story in a nutshell Copies may be had at 35 cents from leading. leading newsdealers or from the Canadian Facts Pub. Co., 588 Huron Street, Toronto.

IN MEMORIAM

In loving memory of our dear daughter and sister, who passed away on March 23rd, 1928,

on March 23cd, 1928.

We loved her in life, she is dear to us still.

Sweet are the memories that will never fade.
She bore her pains and bore them well, and what she suffered none can tell.

Loved and remembered the same today as the horry you passed away.

Mrs. Flater, Sister and Brother.

The Evil Of Grain Mixing

Following the unsatisfactory result of grading the 1928 wheat crop of Western Canada, a veritable deluge or protest and complaint has poured in to Dominion and Provincial Governments, Wheat Pools, Grain Commission, Grain Exchange, and all farmer organizations. Merchants and business me generally, suffering because the farmers have suffered, add their protests. In all this volume of criticism perhaps no one feature has called forth more vigorous objection than has the practice of mixing. It is quite true that everybody does not see eye to eye on this subject, and farmers's themselves are sharply divided on the issue whether or not mixing should be absolutely prohibited and made an offence under the law. While many favor such a policy, others hold the opinion that if mixing was entirely disallowed there would be a terrible glut of low grade and no rande grain on the market, with resulting enormous loss to producers.

The Saskatchewan Grain Inquiry Commission has gathered within its own province a mass of evidence on this and allied subjects affecting the grading and marketing of Western grain, and proposes to carry tis investigations further affeld in Manitoba, Alberta, British Columbia, and Europef, in what is recognized as the most determined attempt yet made to find solutions to some of the acute problems confronting the Western grain grower. In due time the report and recommendations of that Commission will be laid before the legislative authorities.

There is, however, another form of mixing in regard to which there are no two opinions. It is unanimously denounced as an evil, and one that is costing the farmers of Western Canada many millions of dollars annually. Furthermore, control in the case of this particular form of mixing rot mor mixing in or which reference is made is that indulged in by

mixing rests, not with coveriments or wheat proofs, or drain commissions, but with the individual grain grower.

The form of mixing to which reference is made is that indulged in by so many farmers of sowing seed of mixed varieties. Instead of sowing only pure seed of one good variety, the seed too frequently used is a mixture of different varieties, white wheats mixed with red wheats, with consequent loss in value of the crop harvested. Thus the original mixing takes place, not in country or terminal elevators, not on board ship, not in the world markets, but right on the farms of Western Canada.

not in country or terminal elevators, not on board ship, not in the world markets, but right on the farms of Western Canada.

Investigation over a number of years has established the fact that certain varieties are best adapted to certain districts. This information is available to every farmer. It is his for the asking from his nearest Experimental Farm. He should secure this information and then sow the variety which grows best in his district. He may not be able to afford to purchase sufficient pure, registered seed of that particular variety to seed his entire acreage this year, but he should get a few bushels of such pure, registered seed, sow it in a prepared plot, and thus increase his seed supply on his own farm.

The frosts of last Fall make it necessary that all seed sown this spring be first tested for its germinating qualities. Strong germination is necessary in wheat, oats, barley and flax. Strong plants having healthy vigorous roots withstand adverse conditions such as spring frosts, insects, disease, better than weak plants. Farmers will be well advised, therefore, to send samples of their seed grain to their nearest Dominion Seed Laboratory and have it tested.

There is still another form of mixing on the farm which is even more disastrous, that is the mixing of weed seeds with the grain through the use of impure and not properly cleaned seed. Governments and railways combine to run special seed cleaning machinery demonstration trains through the country. Governments build seed cleaning plants. Nevertheless, tons of weed seeds are sown annually, as well as mixed varieties of grain, as was definitely proven by the seed drill survey conducted in Saskatchewan a couple of vill. First, it is essential that all seed sown be of one good

a couple of years ago.

Western Canada farmers must begin at the beginning in dealing with
this mixing evil. First, it is essential that all seed sown be of one good
variety, thoroughly cleaned, with all weed seeds eliminated, and tested to
demonstrate its germinating qualities. With the groundwork thus laid for
the production of clean, high grade grain, necessary further steps can and
should be taken to preserve the identity, grade and standard of that grain
all the way from the farm to the ultimate world market.

place by summer. Experimental

ment Company of Wilmingston, Dol. It is understood that Mr. Armstrong expects the Island to be in place by summer. Experimental flights then will be made between the minland and Bermuda, using the seadrome as a stopping place. If these experiments are successful, the construction of other floats for trans-Atlantic service will be pushed as quickly as possible. The Armstrong company already has conducted tests with large Sicrosity amphibians on areas similar

has conducted tests with large Si-torsity amphibians on areas similar to that of the seadrome, and needs only 65 per cent. of the available space. By scale model tests the com-many has convinced naval engineers that the seadromes will ride any waves up to 190 feet in leight with practically no motion. Eight of these slands are contemplated, it is said, in a chain to Europe by way of the Azores. Planes then would be able im a chain to Europe by way of the Azores. Planes then would be able to leave New York at 6 o'clock in the morning and arrive at Plymouth, England, at 4.30 o'clock the following afternoon.

Recipes For This Week (By Betty Barclay)

ORANGE BREAD

- 1 yeast cake. cup lukewarm water
- egg.

1 egg.
1 tablespoon melted butter.
1 tablespoon melted lard.
1 teaspoon salt.
2 tablespoons sugar.
Grated rind 2 oranges.
3 cup orange juice.
3 cups flour.

3 cups flour.

Dissolve yeast in warm water; add
egg well beaten, butter, lard, salt,
sugar, grated orange rind, orangjuice, and flour. Beat until smooth,
adding more flour, if necessary;
lnead until smooth and elastic; letrise till double its bulk; shape in
double loaf; put in breadpan; let rise
again to double its bulk, and bake
one hour in a moderate oven. This
bread is delicious with orange marmalade for afternoon tea.

CARROT PUDDING

- 1½ cups flour.

 1 cup brown sugar.

 1 cup grated carrots.

 1 cup grated potatoes.

 1 cup raisins.

 1 cup currants.

 1 cup finely chopped suet.

- 1 teaspoon soda.

 1 teaspoon molasse
 A little nutmeg.

Dredge fruit with some of the flour and scald soda before adding. Mix well and steam three hours.

Minard's Liniment for the Grippe and Flu.

Kaiser Cost Germany Millions Every Year

on Has Saved Country Large Sum In Salaries

Admication Has Saved Country Large Sum In Salaries

It has been figured that Germany in the last 10 years has saved \$125,000,000 in salaries to the "former royal rulers of the empire. Before the war the kalser cost Germany \$3,034,000 a year. Then came three hings—of Bavaria, Saxony and Wurtemburg—and seven grand duken, who cost Germany more than \$5,000,000. Besides these royal "so the imperial system brought the annual expenditures up to \$12,050,000. Of course there had to be big armies and generally increased cost of royal show under the royal government but this further cost could hardly be estimated.

Much Time and Attention Devote To Protection Of Roadways

To Protection Of Roadways
Well-constructed highways are
necessary in Canada to meet the insistent demands of traffic, but wellmaintained roads are even of more
importance in the interest of econoconcensuably, readimportance in the interest of economy. Consequently, provincial road
administrative organs and engineers
are devoting a great deal of thought
and attention to the care and protection of roads. In 1927 the mileage of
roads under maintenance in Canada
under the patrol or gang system was
44.416 miles, at a cost of \$16,024,617.

Kilted Americans

Killed Americans
Americans who insist on wearing
the kilts while visiting Scotland are
becoming such a common sight that
the people pay little attention to it.
In the past some of the costunes
of the visitors have been so loud
that true Caledonians shuddered,
but apparently they are becoming
accustomed to the way foreigners
use the plaid.

As much as \$30,000 may be s on the organs installed in the movie houses.

Aviators Anxious To Reach Europo
By Greenland Route

A letter has been received in
Cochrane, Contario, from Bert Hassells and his partner, Crammer, statiing that it is their intention to make
another attempt this year to establish an aerial small route from Chileago to Stockholm, Sweden, via
Greenland. These are from Rockford, Ill., filters who made an unsuccessful attempt to reach Europe by
a northern route last year, the attompt ending when they were forced
to make a landing at Greenland.
This year, according to the filters,
they will attempt the trip in 500-mile
relays, with refueiling stations at
Sault Ste. Marie, Cochrane and two
located at intervals between Cochrane and Greenland. They have asked that the runway which they made
use of last year in taking off from
Cochrane be kept open in preparation for a start this spring.

Take Daylight From Air

Reproduction Of Light Said To Be

A radio aerial draws radio waves out of the air. Radio treats essen-A radio aerial draws radio waves out of the air. Radio treats essentially with sound. Absorption and reproduction of light, by a method strikingly similar to radio is likely to be next. R. T. Gee, London, Ont., inventor, president of the R. T. Geo. Company, Limited, manufacturer of electric light bulbs, is the discoveror. The process, he states, is to be soon available for general use. When it is introduced, it is stated in scientific circles, it will revolutionize limination, which is today chiefly created by electricity. For, in addition to drawing energy out of the air and reproducing it, Mr. Geo's method provides for the storage of such energy until it is needed. This means, it is explained, that the aerials at work in the daytime will not onlyat work in the daytime will not only absorb but also store sunlight for reproduction at night.

Rub It In For Lame Buck.—Brisle rubbing with Dr. Thomas' Eelectric Oil will relieve lame back. The skin will relieve lame back. The skin it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liminent sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Tested Rocket Sled

Tested Rocket Sled

A "rocket sled" was tried out at
the Schleissheim aviation grounds by
Max Valler, inventor of several rocket vehicles. The sled welpts 240
pounds and can be equipped with
eight rockets. Valler, using only two
rockets, made fine speed on level
ground. Spectators tried to visualize
the speed that could be made down a
snowy slope under the impetus of the
rockets, but gave up the attempt
before reaching definite conclusions.

idea Suggested To President Hoover To Stop Smuggling

To Stop Smuggling
Washington.—A federal constabulary, similar to the famous Royal
Canadian Mounted Police, has been
suggested to President Hoover as a
means of ending liquor smuggling
across the Canadian and Mexican

borders.

The constabulary would deal not only with rum running, but also with immigration smuggling, and the ordinary run of merchandise smuggling operations now under the eyes of the customs service.

How Sweet

No Doubt Many Valuable Things
Dropped From Liners
Few landsmen realize that there
are roads and lanes on the sea, as
clearly defined and consistently used
as those on land. These "sea-lanes"
are steamed over by thousands of
ships each year and would disclose
some interesting stories.

After the coming of steam and the
inauguration of definitely planned
routes east and west, the cluders and
ashes, broken crockery, old iron, unneeded ballast and all the rubish
that is thrown overboard, must nave
begun to pile up along the three

that is thrown overboard, must nave begun to pile up along the three thousand miles of ocean floor. On all coal-burning ships sakes are dumped overboard each "watch"— that is, every four hours, but the in-creasing use of oil fuel is lessening the amount of cinders that go over-board each day. Clinkers and askes are not the only things that are dumped. This save tas there in williams broken.

New Settlers Open Big Area
Tremendous Development Taking
Place In Western Canada
In Indicative of the tremendous development which has taken place in
Western Canada, and the large part
be being played by incoming settlers in
that development, the land settlety ment officials of the Canadian National Ralivays in the west estimate
in that the total amount of new land
broken and prepared for crop during
In 1928, in the territory tributary to
the National lines, was 750,000 corres,
of cempared with about 500,000 acres,
of cempared with about 500,000 acres,
of cempared with about 500,000 acres,
of cempared of breaking during the
soming season. The significant feature of this increased fram development is that most of the new land
was broken by incoming settlers, reterrited and directed to locations by
the Colonization Department of the
Raliway Company.

Per Capita Consumption Appears Be Increasing the World Over

In The Diet

Be Increasing the World Over
wheat now contributes one-fourth
of the calories of the American diet,
According to the Food Research Institute, of Stanford University, California, it is still the outstanding
single staje foodstuff. In most
southern European countries, wheat
contributes a larger proportion of total
calories of the diet than in the
United States; but in countries where
rye or rice is the staple cereal, its
contribution is smaller. Its nutritional importance in the United States al importance in the United States

contribution is smaller. Its nutritional importance in the United States lies primarily in the starch content, and in the content of protein, mineral elements, vitamins, or roughage. To consume wheat as whole wheat bread instead of white bread would make no essential contribution to the national health, and would not be in the interest of national ceonomy at least so long as the present American diet continues to prevail. Protein, minerals, vitamins, and roughage are adequately available in other foodstuffs and need not be sought in whole wheat bread. Nutritional security in the diet is rather to be sought in the diet is rather to be sought in the milk supply; and perhaps more than an eighth of the milk supply is secured from mill drails of wheat. Removal of the supply of nilli offals, with attendant Broke Record

Broke Record

Frank Dupuis established a world record but lost the race. He established this record when on the first day he covered the initial 4 in lile lap of the Eastern International Dog Studentles, however, Sepanda, veteral and succeeding days, however, Sepanda, veteral and succeeding days, however, Sepanda, veteral and succeeding days, however, Sepanda, veteran Alaskan musher, succeeded the hittel 4 mile lap of the Days the Westerland of the world when the reach and millions of the winking glass that are liping on their bed of cinders, we reading days, however, Sepanda, veteran Alaskan musher, succeeded in the contradiction of the winking glass that are liping on their bed of cinders, we receding days, however, Sepanda, veteran Alaskan musher, succeeded the hittel veteral the day here were the mild and the wind bear of the honors, but Dupuis' time for the inst day has never been excelled.

Simple Precautions Against FLU

Sore Throat

Health Authorities Point Out The Necessity Of Treating The Simple Cold
At Its Beginning

home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding meteors.

and, especially in the mountains the heavy dews are a never-failing help.

and, especially in the mountains the heavy dews are a never-falling help. The sun, showing blood-red through the smoke, now sank behind the hills and a biessed coolness filled the air. The fire smouldered along the fire-breaks, but the dreaded sparks were not flying. The trembling roar dim-nished to a steady crackling where fallen trees were being steadily con-sumed.

The fire-fighters, their shoulders drooping, and wavering from sheer weakness, plodded down the hill for well-earned food and rest.

- The Danger Signal

Andy's parched lips and bathed his hot face as he lay panting on the ground. He sat up with an effort ann looked about him. "Where's Connie?" he asked. But Connie had stoke.

By mid-afternoon the main body of the fire was apparently under control, but the persistent spot-fires kept the entire crew engaged. A huge cottonwood, standing just within the fire-breaks, was the chief of-

Canada in 1927 was 511, and in 1928. 535. Of the total for two years, 273 were adult males, 557 adult females, and 216 children under 18 years of

Dump Valves For Passengers

They have long had dump valves
in airplanes for gasoline, but now
they have got one for passengers.
Floyd Smith demonstrated the device
at Mercer airport, tilting the passenger sat with a lever and letting a
180-pound dummy passenger hurtle
down from a height of 1,500 feet
The dummy's parachute opened in
one and four-fiths second and the
dummy floated safely to earth. Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nervilline—this will keep the throat free from germs. If the sary sign of tightness in the chest, rub on Nervilline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is nlwave wire to the chest.

the system of impurities and carry off a lot of disease—breeding stes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is y effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon give very satisfactory results.

Up-To-Date Airport

Wilkinson picked up a falling saw.

"Who will go with me?" he called. Gillis stepped forward with wedge and hammer.

"Nothin' doin," said little Blackie, "Wilkinson here has a wife and kid, and lafe feet deep, and allows and large for saylances at the same field that serves land planes. "It is a matter of 11 miles from the discardant and planes." It is a matter of 11 miles from the discardant and planes.

wide, and 16 feet deep, and allows for the landing of seaplanes at the same field that serves land planes. It is a matter of 11 miles from the seaplane landing to the San Francis-co ferry post office. A restaurant to accommodate 150 people was recently completed at the field. There is a coffee shop, a dining room with full view of the field and a hanquest room housed in this build-

ing, in addition to the usual news stand, tobacco shop, soda fountain and souvenir booth, which one is ac-customed to find at any railway sta-tion.

Western Horse Shipments

Twenty-five Thousand Sent To East ern Canada Last Year

western horses to the number of 25,000 were shipped from the prairies to Eastern Canada last year. Most of these horses came from Alberta and Saskatchewan, and were disposed of principally in Ontario and Quebec al principally in Ontario and Quebee although some were shipped as far as Prince Edward Island. The shipments varied from heavy draught animals to light range stock and about 5 per cent. were unbroken. A carload of these unbroken range horses of Percheron and Belgian breeds, was shipped into Palsley, Ont, recently and sold at public auction, realizing an average price of \$71 for the 21 head.

God writes straight on crooked
lines.—Spanish Proverb.

Taken Without Question

Taken Without Question
There are times when we question the pronouncements of the
learned, but one of the things we
have decided not to prove for ourself is the recent statement of a
prominent naturalist that lions are
near-sighted.

Shirts are being worn by constant-ly increasing numbers of Chinese.

"Robot" For Nine Years

ert Chess Player Fooled Patrons Of New York Museum

The secret of perhaps the strangest "robot" ever exhibited in America has been revealed with the death of Peter J. Hill. Thirty years ago in New York city, the proprietors of a dime museum astonished their customers with an "automaton cheaplayer." Thousands, including many internationally known players, tried in vain to defeat the "mechanical man." The robot in reality was Hill, masked and disguised. An expert chess player, he sat in the museum for nine years, shifting the pawns on board with jerky, mechanical movenest, maintaining silence and keep-ments, maintaining silence and keep-ments, maintaining silence and keep-ments, maintaining silence and keep-ments, maintaining silence and keepments, maintaining silence and keep-ing his secret from those with whom he played.

Whales have the largest brains of all mammals, the largest on record weighing 7,000 grams.

Come and enjoy yourself at the Women's Institute Concert, April 12th. Splendid programme from consisting of A Play-, A scream from start to finish-Dances, Musical numbers, etc., Programme will be followed by a dance. Lunch served. There will also be a booth where home made candy will be on sale,

The attention of juveniles who are in the habit of celebrating ar und town when they should be at home and of anyone who rides his bicycle on the sidewalks, is drawn to a warning pulbished elsewhere in this issue by the Council, who are determined to put a stop to both of these nuisances, so heed their warning.

The J. H. C. Tractor School held at Cereal on the 15th inst. was a great success. Chinook and Cerceal were both well re-presented. The moving picture how was very good, and Messrs. Johnson and Brodine are grate-ful to Mr. Hughes for the use of his moving picture machine,

HEATHDALE NEWS

O. Harrington and family of Big Stone who have spant the winter with Mrs. Harrington's mother in the States, have returns ed to their home.

Geo, Cleven returned on Sunday after spending the winter in Facoma, Wash., and visiting with friends in Vancouver, B.C.

Mr. Seager was ill with a bad old this week and was unable to take the mail, but fortunately he had a good substitute as Mrs. Seager took his place.

Mr. and Mrs. J. C. Hess are busy these days geiting ready to move on the farm which they have rented.

A. U.F.A. meeting was held at Cloverleaf on Saturday, March (6th. Mr. Sutherland of Hanna and Mrs. Banner of Oyen, Directors for Acadia U.F.A. were the speakers. Quite a number signup for membership including some of the ladics which makes it a joint local. After the meeting lunch was served. The next meeting will be held on Friday, April, 5th at 8 p.m., at Peyton
